HEMANTO BAIRAGI

7-56 Radcliffe Cres S.E, AB T2A 6L9 Calgary
5872168171
hemanto.bairagi@ucalgary.ca

- Knowledge of telecommunications networks (packet core and radio – > 4G and 5G): protocol/applications/interfaces
- Solid experience deploying and troubleshooting cloud native applications
- Experience with GitLab and GitOps
- Familiarity with Cloudflare services
- Knowledge of DevSecOps fundamentals
- Familiarity with free open source software, their principles and licenses
- Knowledge of test-driven development
- Certifications in public cloud technologies
- Good development experience and skills in Javascript, Python, GoLang
- Knowledge of Git, Maven, Gradle
- ELK, Data Analysis, Monitoring
- Good knowledge of database technologies
- Internet protocol and security (SSL, HTTP, HTTPS, Certificates, REST API)
- Familiarity with 3GPP standards is a plus

https://jobs.ericsson.com/job/Montreal-D%25C3%25A9veloppeur-de-logiciels%20Software-Integrator-Queb/773130702/?feedId=322400%20jobPipeline=LinkedIn%20&utm_source=LinkedInJobPostings

SUMMARY

- Software Engineering specializing in Machine Learning, Artificial Intelligence & Python development.
- Transitioned from Physics, to Financial Physics and Engineering to Software Engineering professionally.
- GitHub Link: https://github.com/Orko24
- LinkedIn Link: https://www.linkedin.com/in/hemanto-bairagi-865027101/

SKILLS

- Software Development.
- Python Programming & Machine Learning.
- Databases
- Data Science & Data Analysis
- DevOps & DevSecOps
- Web Development.

EXPERIENCE

Lead Software Engineer and Software Architect   Jan 2022 to current
IBM Startup Partner Program; Adamas Audio:

- Role was to design, develop, produce, deploy code for Adamas Audio. Currently running ongoing postproduction support.
- Skills gained: Python, Java, Machine Learning, Artificial Intelligence, Networking & Telecommunications, Machine Learning Libraries like Keras, PyTorch, Tensorflow, Sci-kit Learn, Pandas, Numpy, etc. API development, Frontend: HTML, CSS, JavaScript, Node.js, ETL software. Programming Languages like: Python, Java, C++, C#, C, Golang, MATLAB, Mathematica, SQL. Site Operation Management, DNS, Domain Transfer, Site Migration, Cloud Computing Cloud Native Application trouble shooting & public Cloud Technologies, Django, Flask, Redis & Celery data development and integration. Linux, Bash Script, Git, GitHub, GitOps, Cryptography, SSL & Cyber Security, HTTP, HTTPS, REST API, Data Analysis & Data Science. Familiarity in utilizing ORM and SQL based Database technology.

- Recently Site Operations Management and Migration was performed on the site to migrate the web application from Liquid-web dedicated servers to IBM Bare-metal Servers.
- Service went down April 14th due to cost, have been approved by IBM's partner program and am currently receiving $3000 USD for 6 months in funding starting May 1st.
- Postproduction updates written in Golang, Java and C++ to ensure scalability and patentability when profitable, are being applied. Update and update progress hosted in this GitHub repository, and will be <mark>free and open source</mark>: https://github.com/Orko24/FFMPEG_Golang_replacement
- The purpose of Adamas Audio was to allow customers to create custom audiobooks at scale. It is currently hosted at: https://www.adamasaudio.com. Full article detailing it can be found https://adamas-audio.medium.com/adamas-audio-machine-learning-and-web-development-to-produce-cheap-audiobooks-and-voice-cloning-a05608e4485f.
- The components of Adamas Audio were Frontend REST APIs, client data management system, Backend Data Deriving API's, Django Middleware. These components were developed in a <mark>Test-driven environment using agile methodology</mark>.
- Frontend REST API was coded in HTML, CSS, JavaScript. Initialized frontend of the data pipeline. Django Middleware integrated data pipeline from frontend to backend. Backend data processing API's built in Python, C++, C#, C, Java, Golang, SQL. Client database management system doubled up as a data governance policy, to allow security at scale.
- Integrated frontend to backend data pipeline allowed derived datasets and data products per client API request to be created and passed from server to client via the pipeline built through Django Middleware.
- Data products were built using Machine Learning libraries like: Pytorch, Tensorflow, Keras, Scikit-learn, Pandas, Numpy, etc.
- Adamas Audio was hosted using Apache, Apache server instance templates written in C/C++ are given here: https://github.com/Orko24/Apache_django_ssl_web_integration
- SSL certificates were integrated into a DNS to Apache pipeline. This allowed HTTPS technology to encrypt all web traffic per client API request. Django-RQ, SQL and Redis were utilized to ensure all client requests run asynchronously per request at scale.
- Cloudflare services were consulted prior to hosting Adamas Audio on IBM Cloud.

Quant-connect   June 2020 to Jan 2022

Algorithmic Trader June 2020 to Jan 2022
- Made the transition from Physics to Financial Physics and Financial Engineering. Allowed the gaining of experience in Financial Engineering, Software Development and Algorithm Development.
- Algorithms were developed in Python.
- Developed Algorithms integrating machine learning algorithms for data analysis using a data point integrating it into a live data trading feed using lean trading engine Framework: https://www.lean.io/#topic100.html .
- Back-end Derived Data API's utilized algorithms primarily statistical mathematics and deep learning to predict price models trends for commodity futures, public equities, and ETF's.
- Fundamental Pricing Framework algorithms were developed that take into accounts of Fundamental factors of public equities to create a buy/sell model based on the factors.

Undergraduate Researcher   Sept 2019 to June 2020

University of Calgary
- Utilized C++/C to program an Arduino to track photons emitted from experimental green laser.
- Gained knowledge of <mark>telecommunication networks, during research on photonic behavior.</mark>
- Experience utilizing programming languages like Python, C++, C, Mathematica, and MATLAB in a professional research setting.
- Thesis is given in this GitHub repository: https://github.com/Orko24/ODMR_thesis/blob/master/Hemanto_Bairagi_Final_Report_Draft_3%20(1).pdf
- Link verifying research: http://quantumalberta.ca/wp-content/uploads/2020/12/IQST-2020-Report.pdf

- ODMR thesis: Worked on building a building an optically detected magnetic resonance (ODMR) microscope, with the intent of mind to use qubits to produce nanoscale imagery and video.

EDUCATION & TRAINING

Bachelor of Science: Astrophysics
University of Calgary
Calgary, AB
From Sept 2016 to Feb 2021
- Achieved Honors
- Dean's List Honoree [2020]
- GPA: 3.5/4.0

Bachelor of Science: Physics
University of Calgary
From Sept 2016 to Feb 2021
- Achieved Honors
- Dean's List Honoree [2020]
- GPA: 3.5/4.0
